TrueCare releases Vaccination Verification Service

TAMPA (FL) – September 2, 2021 | TrueCare™ announced the release of their Vaccination Verification Service. This digital platform will help organizations to verify the vaccination status of their employees and record any specific exemptions.

“With our platform, companies can quickly invite employees to confirm their vaccination status, receive vaccination verification, view exemptions, and export the data for use in the internal systems and integrated individualized reporting system helps to reduce liability and stay in compliance with corporate/governmental policies,” says Louis [Camassa](#), Head of Product at TrueCare™.

Thanks to the technology that underlies the product, the deployment of the Vaccination Verification Service takes a few minutes and doesn’t require special technical skills or complex integrations.

Clients can request an individual [Demo](#) session with the TrueCare team.
